

Savchenko Illia

ABOUT ME

Junior DevOps Engineer specializing in automation and cloud technologies. I worked at the startup PowerHub, where I participated in the development and maintenance of a SaaS platform for monitoring workspace availability. I am currently studying management at the Kozminski University and striving for further professional growth in the DevOps field. I am well-organized, manage my time effectively, and continuously expand my knowledge to improve my efficiency.

Personal Project – [RTSP Recorder to Cloud](#)

COURSE: DEVOPS ENGINEER – ROBOT DREAMS | 2024-2025

During the course, I worked with the following technologies:

- **Databases:** SQL, NoSQL, replication
- **Containers & Orchestration:** Docker, Kubernetes, Docker Swarm
- **Cloud & IaC:** AWS (EC2, S3, ECS, SSM, DBs, CloudFormation), Terraform, Ansible
- **CI/CD & Monitoring:** Jenkins, GitHub Actions, Grafana, Prometheus

Certificate: <https://lms.robotdreams.cc/certificate/422d41654cc83bd1198147fea9961159>

WORK EXPERIENCE

IT Administrator / Monitoring Specialist

October 2021 – August 2023

Managed the configuration and maintenance of IT infrastructure in grocery stores, including computers, servers, and CCTV systems. Installed and serviced over 80 cameras across 6 locations, ensuring the proper operation of more than 200 cameras. Created documentation for hardware and network connections.

- **IT administration** and **CCTV monitoring**
- Installation and maintenance of **80+** cameras
- Management of **200+ camera** infrastructure
- Technical documentation creation

Inter Cloud DevOps – Startup PowerHub

March 2024 – November 2024

Automated and managed AWS infrastructure by implementing Terraform and Ansible for resource configuration. Designed and optimized CI/CD pipelines in GitLab, accelerating application deployment and improving environment stability.

- Designed and deployed **AWS** infrastructure (EC2, S3, RDS, VPC) using **Terraform**
 - Automated server and application configuration with **Ansible** playbooks
 - Optimized **CI/CD** in **GitLab** – reduced deployment time and container size
 - Created and managed **IAM** policies to enhance security
-

EDUCATION

Kozminski University

Warsaw, Poland

Bachelor's Degree in Management,
(September 2023 – June 2026)

- GPA: 4.72/5.0
- Active participation in group projects

LANGUAGES

- Polish – B2 (certified)
- English – B1+
- Ukrainian, Russian – Native
