SUMMARY

DevOps Engineer with experience in infrastructure automation and cloud solutions. Worked with **AWS** (EC2, S3, RDS, VPC), **Terraform**, **Ansible**, **Docker** and **Kubernetes**. Built **CI/CD** pipelines and implemented monitoring using **Prometheus** and **Grafana**. Combining technical and managerial skills while pursuing a Management degree at Kozminski University. Preparing for the **AWS Solutions Architect Associate certification**. Focused on reliability, scalability, and continuous improvement.

TECHNICAL SKILLS

- **Cloud:** AWS (EC2, S3, RDS, VPC, ECS)
- **IaC / Automation:** Terraform, Ansible
- **Containerization:** Docker, Kubernetes
- **CI/CD:** GitLab CI, Jenkins, GitHub Actions
- **Monitoring:** Prometheus, Grafana
- **Databases:** PostgreSQL, MongoDB
- **OC:** Linux, Proxmox
- **Scripting Languages:** Bash

WORK EXPERIENCE

Cloud DevOps – PowerHub

Feb 2024 – Apr 2025

- Automated and managed AWS-based infrastructure to support a **SaaS** platform
- Provisioned and configured servers and applications using **Ansible** and **Terraform**
- Optimized **CI/CD** pipelines in GitLab, reducing deployment time and improving efficiency
- Integrated on-premise bare-metal infrastructure using **Proxmox**

IT Administrator / Monitoring Specialist

Oct 2021 – Aug 2023

Managed configuration and maintenance of IT infrastructure in retail stores, including computers, servers, and video surveillance systems. Installed and maintained over **80** cameras across 6 locations, monitored the operation of more than **200** cameras.

COURSE: DEVOPS ENGINEER – ROBOT DREAMS | 2024-2025

During the DevOps Engineer course at Robot Dreams, gained extensive hands-on experience working with **Docker**, **Kubernetes**, **Terraform**, **Ansible**, and **AWS** cloud services (EC2, S3, ECS, SSM, CloudFormation). Built CI/CD pipelines using Jenkins, set up monitoring with **Prometheus** and **Grafana**, and worked with SQL and NoSQL databases.
